

JTIW-80

Intelligent manufacturing Single/ Entire Automation Unit

Product descriptions and features

■ Features

- Perform real-time monitoring of the machine processing status, task management and file transmission through intelligent interconnection.
- Different models of robots can be matched to meet the production needs and processing in an all-round way
- Large capacity intelligent silo can hold 140 workpieces at the same time

■ For Material

graphite, copper, aluminum, steel, stainless steel, etc

■ Applied Range

mold and component automatic machining

Parameters

Item	Parameter
Maximum workpiece height	75x75x120mm
Maximum transfer weight	80kg
Number of silo stations	140
Maximum workload	1000kg
Machine net dimension	2400x1430x2700mm
Machine net weight	2500kg
